

AMENDMENTS TO THE SPECIFICATION

On page 2, line 1, please amend the "Cross Reference To Related Applications" as follows.

Cross Reference To Related Applications

This application is a division of serial no. 10/094,161 filed 03/06/2002, Patent No. 6,908,784.

This application is related ~~to serial no. 10/646,897, filed 08/21/2003,~~ to serial no. 10/719,907 filed 11/21/2003, Patent No. 7,029,949, to serial no. 10/719,876 filed 11/21/03, Patent No. 6,964,915, to serial no. 11/052,279 filed 02/07/05, to serial no. 11/050,857 filed 02/07/05, to serial no. 11/146,397 filed 06/06/2005, Patent No. 7,157,353, to serial no. 11/390,321 filed 03/27/06, to serial no. 11/204,264 filed 08/15/05, ~~and~~ to serial no. 11/339,177 filed 01/02/2006, and to serial no. 11/496,180 filed 07/31/2006.

Please amend the paragraph on page 52, lines 10-21 (paragraph [0237] of the published application) as follows.

Although the component 16E is illustrated as having terminal contacts 42E on only the circuit side 20E, it is to be understood that the component 16E can be fabricated with conductive vias substantially as previously described for conductive vias 68A. Accordingly, the component 16E can be configured substantially similar to the component 16A of Figure 10A, the component 16A-A of Figure 11A, the component 16A-B of Figure 11B, the component ~~16A-C~~ 16I of Figure 12A, or the component ~~16A-D~~ 16I-EC of Figure 12B. In addition, the component 16E rather than having terminal contacts 42E can be formed with an edge connector 43 substantially as shown in Figure 5B.
